

Inheritance

Student inherits from Person

Presented by Hira Iqbal

```
#include <iostream>
using namespace std;
class Person {
public:
    string name;
    void display() { cout << "Name: " << name << endl; }
};
class Student : public Person {
public:
    int rollNo;
};
int main() {
    Student s;
    s.name = "Hira";
    s.rollNo = 10;
    s.display();
    cout << "Roll No: " << s.rollNo;
}
```
