Polymorphism Function Overloading

Presented by Hira Iqbal

```cpp
#include <iostream>
using namespace std;
class Math {
public:
int add(int a, int b) { return a + b; }
double add(double a, double b) { return a + b; }
};
int main() {
Math m;
cout << m.add(3, 4) << endl;
cout << m.add(2.5, 3.7);
}
```
